FRONTEND DEVELOPER

I have a wealth of experience as a web developer and specialize in crafting intuitive user experiences. I am proficient in both JavaScript and TypeScript and focus on front-end development using React.js and Next.js frameworks. Beyond coding, I also have a keen eye for design and usability to enhance projects and collaborate seamlessly within agile environments. Additionally, I am skilled in using testing tools to ensure robust and polished outcomes. With proficiency in Figma, I am adept at translating ideas into engaging interfaces and can help bring innovation and elegance to your projects.

PROFESSIONAL EXPERIENCE

Cooperative Bank of Oromia, Innovation Hub (DxValley)   **Sep 2022 - Present**
Software Engineer
I am currently freelancing at the Cooperative Bank of Oromia within the Innovation Hub known as DxValley. At DxValley, my main role involves crafting interactive and user-friendly front-end web products, where creativity and innovative problem-solving are encouraged, having contributed to diverse projects such as **Sooqpass, WSO2, Furtu, Farmpass, DxValley and Debo fund**.

I played a significant role in the front-end development and successful deployment of **Souqpass**, which is a Coop product and the first of its kind in Ethiopia. It enables seamless payment processing, integrates a buy-now-pay-later feature, and introduces revenue-based financing. Within the first quarter, we achieved a sharp increase in user engagement and helped many merchants grow their businesses.

Played a key role in implementing and deploying **WSO2** for integration and API management, improving system performance and enabling seamless communication between services.

Contributed to the front-end development of **Furtu**, a fintech platform enhancing customer experiences with its user-friendly interface and smooth financial services.

As a front-end developer for **Debo**, I helped develop a platform that allows users to initiate and participate in crowdfunding campaigns. We successfully drove fully funded projects through Debo.

PERSONAL PROJECTS

Ftawa
A collaborative online platform I contributed to, where users can pose questions and connect with knowledgeable teachers for insightful answers. My focus? Crafting an efficient and user-friendly admin dashboard, empowering administrators to manage inquiries seamlessly. Leveraging Next.js, Tailwind, Shadui, and Firebase, we've curated a dynamic environment that fosters learning and community engagement.

Milki
A performance measurement tool designed for government sector employees across diverse regions. It streamlines evaluations, eliminating manual preparation, speeding up responses, and enhancing overall ease of use.

EDUCATION

Bachelor of Science in Computer Science and Engineering
Adama Science and Technology University

SKILL

JavaScript/TypeScript	Figma	Jest
React	Tailwind CSS	Material UI
NextJs	Headless UI	SCSS
Node	Shadcn UI
